

Finally, Playing Outside Sounds Really Good

Now you can have legendary Polk Audio® sound anywhere on your property. Since 1987, Polk Audio has been refining the art of the subwoofer/satellite system. Now we've brought our experience outside, creating a subwoofer and satellite loudspeaker specifically designed to blend in with your landscape, to live outdoors year round and to stand out with their sonic performance. Around a pool, along a path, off a deck or even in the garden, now you can fill your property with the great sound Polk Audio.

Subwoofer Features

- **Weatherproof**—so it can live outdoors year round.
- **Downward Firing Subwoofer**—No one will ever know it's a subwoofer, because it looks like a plant stand or pedestal table and is robust enough to be used as such.
- **10" Long-Throw Dual Voice Coil Weatherproof Driver** produces earth-shaking bass or full, rich sound even at background listening levels.
- **Subwoofer's Epoxy Seal Enclosure** will stand up to every season for years to come. The enclosure's color is embedded into the material, yet it can be painted to match your landscape design.

Satellite Speaker Features

- **Weatherproof** for year round performance.
- **Acoustically Matched Satellite Speaker** creates mid and high frequencies that blend seamlessly with the subwoofer.
- **Satellite Cabinet Is Mineral Filled Polypropylene** and sealed to be a four-season speaker, enabling it to withstand a variety of weather.
- **Satellite Employs A 3 1/2" Long-Throw Midrange Driver And A 3/4" Dome Tweeter**, both of which possess an ideal balance of stiffness, damping and low mass for superb clarity, detail and high efficiency.
- **Stainless Steel Grille And Hardware** because these speakers live outdoors.
- **Satellite Mounting Options** include mounting on a deck on a wall, drop it from a ceiling with the supplied pendant. Or you can drive a security stake into the ground and angle the speaker where you want the music.
