

The One Speaker For All Seasons

Indoors or out, multi-zone or second room, Polk Audio's Atrium Multi-Application Loudspeakers are versatile enough to deliver great sound anywhere your clients want it. The rugged Atrium Series meets or exceeds stringent industry and military specifications for full exposure to the elements for years of reliable high performance sound anywhere in and around a home. Polymer driver cones with butyl rubber surrounds housed in a watertight ABS cabinet stand up to Mother Nature and yet deliver real bass response. The dome tweeter (with a small but powerful neodymium magnet) broadly distributes high frequencies to cover large areas with high fidelity Polk Audio sound. The self-powered, indoor-only Atrium45p gives you the flexibility to take advantage of the "multi-room" receiver function, bringing high performance sound and remote volume control to extra rooms without adding extra amplifiers. Simply run a set of speaker wires (or line level cables) from the main receiver, pre-amp or amp to the Atrium45p for incredibly convenient sound. Put incredible sound anywhere, with the versatile Polk Audio Atrium Series Multi-Application Loudspeakers.

Features

- Outdoor models meet or exceed ASTM D5894-UV Salt Fog, Mil standard 810 Immersion and Mil standard 883 Method 1009 8 for salt and corrosion tests.
- Front panel volume control allows remote volume control without the need for an IR repeater.
- Built-in rustproof bracket gives you multiple mounting options and a full 90° rotation: aim them to deliver the best possible sound in a variety of locations.
- Rustproof aluminum grille has 55% open area for superior sound quality.
- Stylish sculpted front baffle and rounded enclosure look great, and minimize diffraction (sound reflecting off of hard edges) for more open and lifelike imaging.
- Gold plated 5-way binding post speaker-level inputs.
- Available in either black or white.
- White speaker may be painted to match any room color.

Specifications
