Consumer Benefits

A full system in one box

A typical sound bar can provide exceptional sound, but it's not a traditional surround sound experience. The Polk True Surround III takes everything great about a sound bar and adds a powerful subwoofer and two wireless rear speakers to create a full 5.1 experience.

True Dolby-driven Surround Sound

With Dolby Digital surround sound decoding, a performance-tuned driver array, a wireless subwoofer, and two surround speakers, you can enjoy an immersive, room-filling home theater experience that gets the most out of your favorite movies and TV shows, every time.

Works with Virtually Any TV

Because this system was designed to work beautifully with virtually any TV and its remote control, you know you are going to get a big, immersive, surround sound experience in your home.

Simple setup takes only minutes

Connect the sound bar to virtually any TV with an included cable, then use an easy button-based system to sync the surround speakers and the subwoofer with the sound bar. An included quick start guide walks you through setup.
